ACOUSTIC CLOUDS

Sound clouds is used in homes, commercial offices, medical facilities, court rooms, and in secure facilities to provide secrecy..

ACOUSTIC WOODEN PANELS

BASIC MATERIAL : Moisture- proofing and mildew-proofing MDF board, thickness of 15mm or 18mm. Other thickness and type of board also available to customer's requirements.

FINISHING : melamine finishing according to color card; natural wood veneer also available with customized painting.

ACOUSTIC FABRIC : fire-proofing and sound absorbing black thin acoustic fabric attached to the back.

WIDTH : 128mm or customized size.
LENGTH : 2440mm at the max, or customized size.

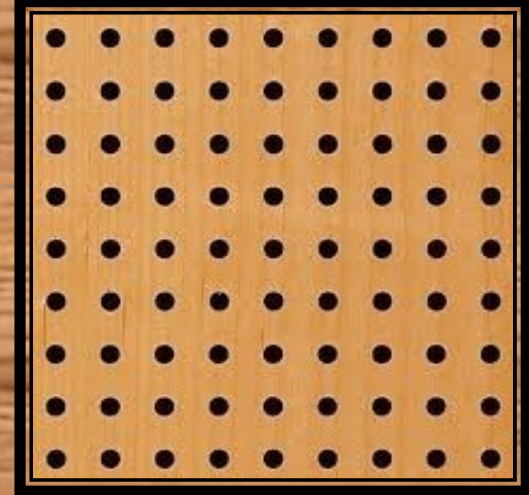

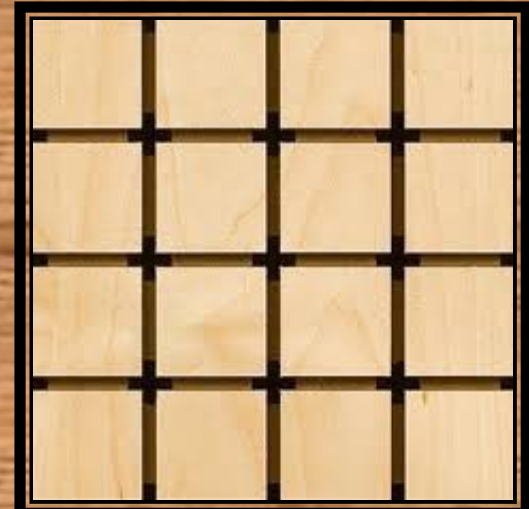

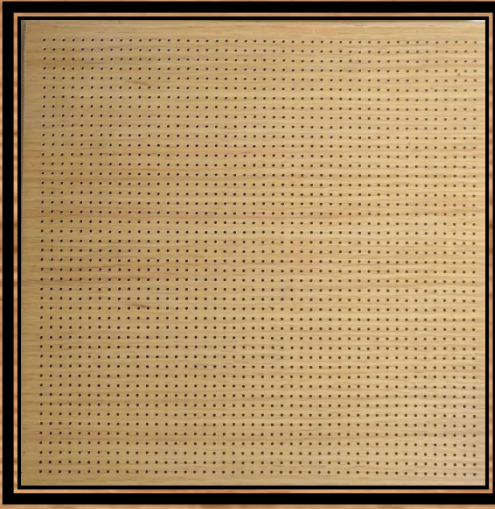

TOLERANCE : 0.1mm on width, 2mm on length.

CONNECTION : could make into 90 degree angle of the rabbet and notch on the length size..

ACOUSTIC WOOD PANEL

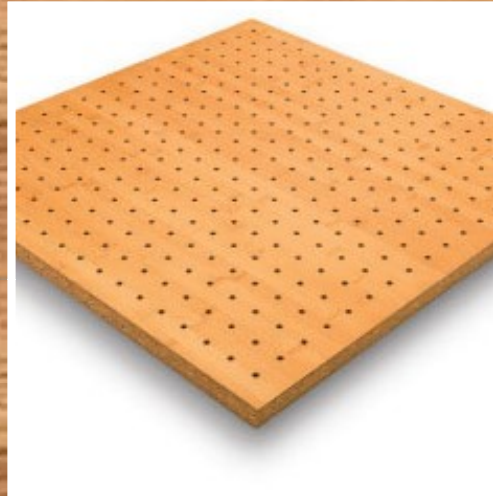

Acoustic Wood Panels never look out of place. Like the idea of improved acoustics itself, attractive wood panels in an office or business bring an added sense of style and grace to the surroundings. These are not necessarily just pure, blank wooden acoustic panels, either. We can provide you with custom patterns and designs to your specifications, so your wood acoustic panel soundproofing efforts match your existing décor or enhance it in a way you previously may not have considered..

RANGE OF TIMBER ACOUSTIC PANEL

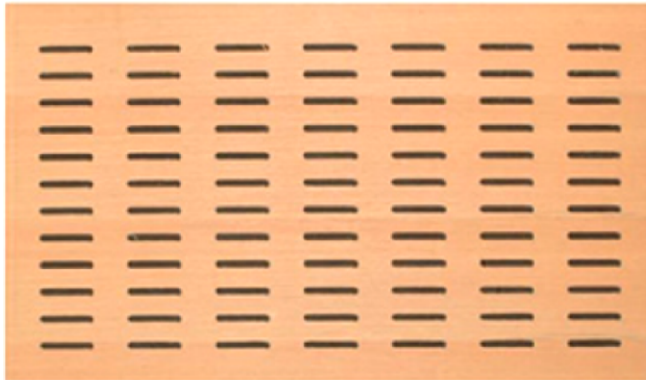

Classroom Acoustics: Any teacher will tell you anything that can control the sound of the classroom is welcome. The right wood acoustic panel arrangement can do just that without creating an additional distraction for the students

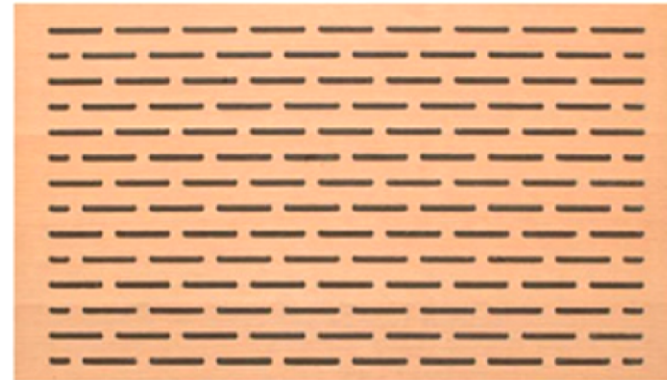

ACOUSTIC WOODEN CEILING

Acoustic wood panels can improve acoustics so diners can better hear each other. They'll also be less prone to accidentally eavesdrop on others' conversations and improve ability communicate
